Att: Mr. George Oliver

Gentlemen:

ASBESTOS DISPOSAL REQUEST

Mobil Oil Corporation, East Chicago Terminal, 3821 Indianapolis Boulevard, East Chicago, Indiana, is requesting State approval to dispose of waste insulation throughout the 1984 year at Wheeler Sanitary Landfill. The exact composition of the insulation is unknown, but it may contain some asbestos and will be handled accordingly, using the precautions outlined in Subpart B - National Emission Standards for Asbestos.

As outlined in our prior asbestos disposal request, the "Mothballed" East Chicago Refinery was declared surplus equipment to be listed for sale and removed as business conditions permit (assume three years). At various times throughout the 1984 year we plan to remove insulation from the unit areas (approximately 600 cu. yds.) and will generate smaller amounts as equipment is sold and prepared for removal (approximately 90 cu. yds.) We will reevaluate our insulation removal program again next year and provide the agency with the necessary information accordingly.

Your prompt attention to this matter will be appreciated, so that the East Chicago Terminal may dispose of this waste as soon as practical.

Very truly yours,

G. D. Sweet  
Terminal Superintendent
